Subject: Inspection of Monster Cub Aircraft for Restoration Project

To Whom It May Concern,

This letter is to inform you that the BAMT 302 students will conduct an inspection of the Monster Cub aircraft as part of our Aircraft Restoration Project. The purpose of the inspection is to assess the aircraft's current condition, identify any damaged or missing components, and document the findings before restoration work proceeds.

The inspection will focus on the aircraft's structural condition and overall status to support the restoration project and provide a basis for planning the necessary restoration activities.

Thank you for your cooperation.

Respectfully yours,

BAMT 302
